

Steps to Create GitHub Account

Step 1: Visit the GitHub web site

https://github.com/

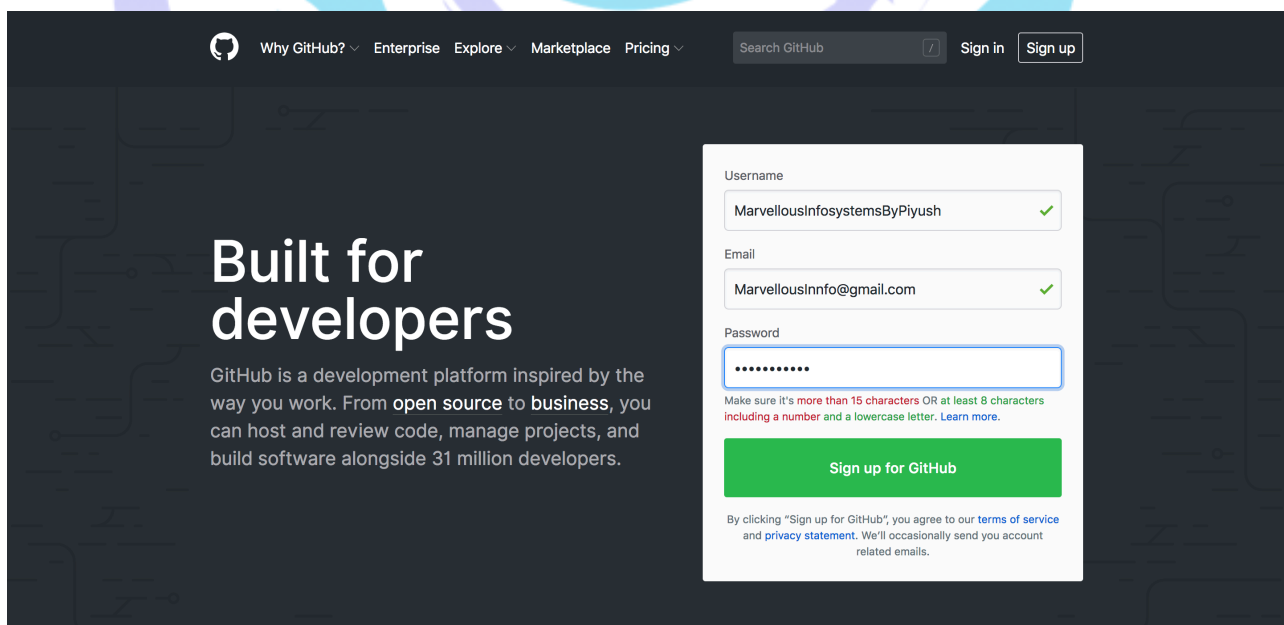

The screenshot shows the GitHub homepage with a dark background and a grid pattern. On the right side, there is a white sign-up form. The form has three input fields: 'Username' with the placeholder 'Pick a username', 'Email' with the placeholder 'you@example.com', and 'Password' with the placeholder 'Create a password'. Below the password field, there is a note: 'Make sure it's more than 15 characters OR at least 8 characters including a number and a lowercase letter. [Learn more.](#)'. At the bottom of the form is a green button labeled 'Sign up for GitHub'. Below the button, there is a small disclaimer: 'By clicking "Sign up for GitHub", you agree to our [terms of service](#) and [privacy statement](#). We'll occasionally send you account related emails.'

Step 2: Create an account

Click the green Sign Up for GitHub button

Enter a username, your email address and a password.

This screenshot shows the same GitHub sign-up form as the previous one, but with the fields filled out. The 'Username' field contains 'MarvellousInfosystemsByPiyush' and has a green checkmark. The 'Email' field contains 'Marvellousinfo@gmail.com' and also has a green checkmark. The 'Password' field is filled with dots. The green 'Sign up for GitHub' button is still visible at the bottom of the form. The disclaimer text remains the same.

Step 3: Verify Account

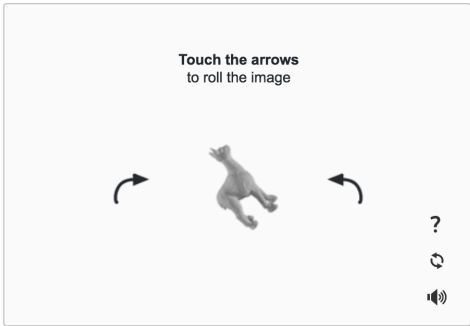

Answer some questions for verification purpose.

Step 4: Select a plan

GitHub provides several levels of account plans but you can create unlimited public repositories with a free plan so for now, you can select that one.
